- Automated QA/QC Inspections: Created a multi-cycle post-repair inspection engine that automates pass/fail grading across 5 core composite parameters (surface profile, DFT, hardness, etc.), complete with automated summary reports and QR-verifiable warranty certificates.
- ITSM & Enterprise Integrations: Developed six core ITSM modules using FastAPI and SvelteKit with SLA tracking, while modernizing ERP procurement, general ledger accounting, and JasperReports PDF generation.
- DevOps & Reliability: Automated zero-downtime Docker deployments to AWS (EC2/ECR) via GitHub Actions, establishing full test suites (800+ pytest and vitests) that eliminated regression downtime.
